

ZV4 713.0.0

ZV4 402.0.0

Models of METTEM® locks recommended for fireproof doors (certificate of the Russian governmental standard No POCC RU.SL34B00864 from 04.04.2014)

ZV4 713.0.0 is a mortise cylinder fireproof lock. The model corresponds to the highest 4th class of the Russian governmental standards (provided that the lock is used together with a cylinder mechanism of the highest class and an armoured plate).

ZV4 402.0.0 is a mortise cylinder fireproof lock. The model corresponds to the 3rd class of the Russian governmental standards (provided that the lock is used together with a cylinder mechanism of the 3rd or 4th class and an armoured plate).

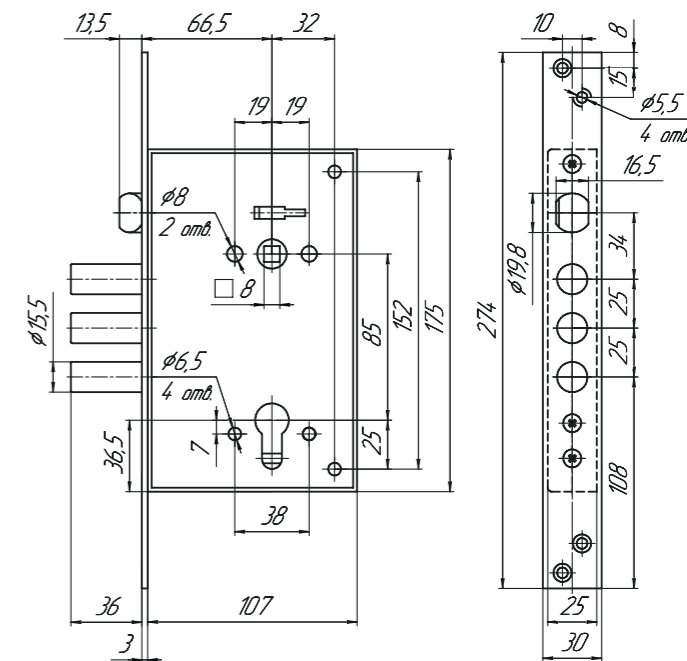

METTEM® locks ZV4 713.0.0 and ZV4 402.0.0 do not contain any details of low-melting materials and therefore these models provide reliable door fixation even at higher temperatures.
